SKILLS

PROGRAMMING

Front End:
• HTML
• CSS
• JavaScript
• Jquery

Back End:
• PHP(Laravel,CakePHP)
• Node Js (Express Js)

DataBase:
• Mysql

Third party API:
• Zoom
• Payment Gateway
• SMS
• Firebase
• Google API
• FaceBook API

Version Control Tool:
• GIT
• Jira

Language
• Tamil
• English

Strength
• Decision Making

Personal Info
• DOB: 07/07/1996
• Marital Status: Married

EXPERIENCE – 6 Years

NED Technology Private Limited | SENIOR DEVELOPER
Feb 2023 - Till Present | Chennai, Tamil Nadu

• Design, develop, and maintain server-side logic for web applications.
• Create scalable and efficient server-side applications using Laravel and Node.js.
• Implement RESTful APIs.
• Integrate and manage databases such as MySQL.
• Write efficient and optimized queries.
• Ensure data security and perform database migrations.

KA SOFTWARE | DEVELOPER | 1.1 Year
Jan 2022 – Jan 2023 | Chennai, Tamil Nadu

• Design and implement scalable architecture for web applications.
• Optimize application performance and server response times.
• Handle asynchronous operations effectively using Promises, async/await, or callbacks.
• Implement security best practices, including data encryption, user authentication, and authorization (e.g., using JWT, OAuth).
• Protect against common web vulnerabilities like SQL injection, XSS, and CSRF.
• Debug and troubleshoot application issues, ensuring smooth operation.
• Collaborate with front-end developers, designers, and other stakeholders to ensure cohesive development.
• Document code, APIs, and technical specifications for future reference and team collaboration.
• Participate in code reviews and contribute to the improvement of the codebase.

HANSA CUSTOMER EQUITY PRIVATE LIMITED | Analyst | 10 Month
Feb 2021 – Dec 2021 | Chennai, Tamil Nadu

• Analyze complex technical problems, devise innovative solutions, and implement best practices to address challenges and optimize system performance.
• Conduct thorough code reviews to ensure adherence to coding standards, maintain code quality, and identify opportunities for improvement
• Collaborate with stakeholders to define system architecture, design scalable solutions, and make informed technology decisions to meet business objectives.
• Communicate technical concepts clearly and effectively to non-technical stakeholders, collaborate with team members to achieve project goals, and foster a positive and collaborative work environment.

FEAT BUSINESS SOLUTIONS | DEVELOPER | 1.8 Year
Dec 2018 – Sep 2020 | Chennai, Tamil Nadu

- Write clean, maintainable code following coding standards and best practices. Conduct thorough testing of code to identify and fix bugs, ensuring software quality and reliability.
- Collaborate with senior developers and team members to assist in project tasks, provide support in troubleshooting issues, and contribute to the overall success of the team.
- Document code changes, project progress, and technical specifications effectively. Communicate with team members to clarify requirements, provide updates on tasks, and seek guidance when needed.
- Actively participate in code reviews, seek feedback on work, and implement suggestions for improvement. Contribute ideas for process enhancements and innovative solutions to enhance team productivity and efficiency.

Project Details

Piota

- Implemented features for student and teacher management, including authentication, role-based access control (RBAC), and user profile creation.
- Developed course management modules, allowing teachers to create, update, and manage courses, assignments, and assessments.
- Built a real-time communication system between students and teachers using WebSockets for chat and collaboration on course material.
- Integrated assignment submission and grading features, allowing students to upload files and teachers to provide feedback within the platform.

Silicon Practice

- Developed a healthcare platform called Silicon Practice using Node.js, designed to streamline patient management, appointment scheduling, and medical records for healthcare providers.
- Implemented secure user authentication for patients and healthcare professionals, with role-based access control (RBAC) for doctors, nurses, and administrative staff.
- Designed a comprehensive appointment booking system, allowing patients to schedule appointments with healthcare providers based on availability.
- Integrated electronic medical records (EMR) management, enabling secure storage, retrieval, and sharing of patient data across authorized personal.

Singlebag

- Created comprehensive product management features with CRUD operations, product filtering, categories, and tags to enhance user experience.
- Developed a shopping cart and wishlist system that allowed users to persist their selections across sessions.
- Integrated with popular payment gateways like Stripe and PayPal, ensuring secure and seamless checkout experiences.
- Managed order processing, including order status updates (pending, shipped, delivered) and real-time stock management.
- Integrated with shipping providers for real-time shipping cost calculations and order tracking.

Tvsfit

- Developed TVS Fit, an outlet billing system using PHP Frameworks designed to streamline the billing and invoicing process for retail outlets.
- Implemented a point-of-sale (POS) system allowing users to generate bills, apply discounts, and process returns efficiently.
- Designed features for product management, including inventory tracking, SKU management, and real-time stock updates.
